Scientific Information Skills

Content
This subject develops the skills and knowledge required to deal with scientific information – text and numerical. It provides the assessment for the course unit MSL925001A Analyse data and report results.

It covers:
• summarising and evaluating numerical data
• interpreting and generating graphs

Assessment
This subject is assessed by assignment only. There are FOUR assignments of equal value.

All work MUST be submitted electronically by email or from memory stick.

This unit is graded with three levels of Competent based on the marks achieved from the assignments:
• Competent – 50-74%
• Competent (Credit) – 75-87
• Competent (Distinction) – 88+

You will not be able to pass with by submitting only two assignments: three is the minimum.
